

Quarterly Population Report

Third Quarter 2014

Growing, but slowing¹

Alberta continues to experience solid gains, but growth is moderating. As of October 1, 2014, Alberta's population was 4,145,992, an increase of 24,300 people from the second quarter. Alberta's population grew at a rate of 0.59% this quarter, closely followed by British Columbia (0.58%), the two fastest growing provinces this quarter. This is the first time in 15 quarters that Alberta's population growth rate did not outpace the three largest provinces by a substantial margin.

Year-over-year, Alberta's population expanded by 2.64%², more than twice the national average (1.10%). Over this period, the province added 106,810 new residents, down slightly from the last year's record high, but still a striking increase.

1 All data are from Statistics Canada. Estimates from 2007–2014 are based on the 2011 Census adjusted for net census undercount and incompletely enumerated Indian Reserves. All estimates are subject to revision.

2 This growth represents year-over-year variation (October 1, 2013 to October 1, 2014)

Migration

Migration continues to drive Alberta's growth, accounting for just under two-thirds of the population growth in the quarter. Alberta welcomed 15,171 new residents from other parts of Canada and the rest of the world. While still solid growth, this level is lower than the enormous inflows seen over the last few years, a trend that points to softening net migration to Alberta (Figure 1).

Interprovincial Migration

Thanks to interprovincial migration, Alberta welcomed 6,320 new residents. While not a weak showing in the broader historical context, net inflows were down almost 40% compared to the same quarter in 2013 (10,300).

Table 1: Population & Growth Rates Canada and Alberta

1-Oct	Population		Yearly Growth Rate		
	Canada	Alberta	1-Oct	Canada	Alberta
2009	33,756,714	3,694,520	2009	1.15%	2.08%
2010	34,131,451	3,747,504	2010	1.11%	1.43%
2011	34,472,304	3,811,729	2011	1.00%	1.71%
2012	34,880,248	3,918,218	2012	1.18%	2.79%
2013	35,289,003	4,039,182	2013	1.17%	3.09%
2014	35,675,834	4,145,992	2014	1.10%	2.64%

BC	4,657,947	1.19%
YT	36,758	1.27%
NWT	43,795	-0.08%
NVT	36,687	2.53%

Among the provinces, only Alberta and British Columbia experienced positive net inflows of interprovincial migrants in the third quarter. On the other hand, Quebec (-5,021) and Manitoba (-2,363) saw the largest net losses. The majority of Alberta's newcomers were from Ontario (2,677), Quebec (2,110) and Manitoba (1,016) (Table 3).

This quarter marks some notable shifts in interprovincial migration patterns. Firstly, while Ontario continues to be a major source of interprovincial migrants moving to Alberta, this quarter's net flow is the lowest since the end of 2011. Secondly, Alberta recorded a net loss to British Columbia for the first time since early 2011. As Ontario and British Columbia are historically large players in the interprovincial migration scene, these shifts may foreshadow lower gains for Alberta in the future.

Net International Migration

Net international migration added 8,851 new Albertans this quarter, accounting for 36% of Alberta's population increase.

The province continues to be very attractive to immigrants, welcoming 10,289 permanent residents this quarter, the highest third quarter on record. Alberta drew 15.7% of all immigrants arriving in Canada. Only Ontario (35.0%) and Quebec (22.6%) attracted larger shares of immigrants this quarter.

In the past several years, net non-permanent residents (NPRs) have helped drive Alberta's blistering population growth. As mentioned last quarter, Citizenship and Immigration Canada is now using new methods to allocate NPRs to specific provinces/territories when none is specified. This change has reduced the net number of NPRs to Alberta in recent quarters. This, in addition

to policy changes related to the Temporary Foreign Worker program, has impacted the net flow of NPRs to Alberta this quarter. The province received just 431 NPRs (net), less than 1/10th of the NPRs received the same quarter last year (5,487).

The decrease in net NPRs is a drag on international gains for Alberta; however, the province remains the destination of choice for record numbers of permanent residents from other parts of the world.

Natural Increase

Alberta's natural increase continued to be a significant driver of growth this quarter, with 14,874 births and 5,745 deaths recorded. The provincial population grew by 9,129 people, or 0.22% this quarter thanks solely to natural increase. Alberta claims the highest natural growth rate of all the provinces, and our relatively high birth rate will help keep us youthful.
